

Practical 8. Working With Information

Xin Chen

Semester 2, 2018/19

8.1 Objective

- Critical assessments of the codes developed by peers.

8.2 Introduction

During the practical, you have written python codes to solve one problem. In this tutorial, your instructor will first explain example solutions to the problem and will then ask 3–5 students to show their codes. Other student can make critical assessments on these codes, especially regarding style and readability.

8.3 Agenda

- Explain example solutions and show where to get relevant documents. 10–15 min
- Choose 3–5 students to share their codes for critical assessments. 10–15 min each
